

BIO-POWER PLUS

- Biodegradable
- Low-foaming and VOC-free
- Removes animal fat
- Alternative to solvents and alkaline degreasers
- Efficient removal of slag
- For manual and mechanical use

Bio-Power Plus is a high performance cleaning fluid with strong dissolving power. This clear waterbased micro-emulsion degreaser is a powerful cleaning agent designed for use in parts washers or for manual cleaning. The product effectively breaks down even heavy contamination and stubborn dirt such as grease, wax, oil and bitumen from most metal and plastic surfaces. Bio Power Plus easily removes rubber marks from linoleum floors as well as black streaks on caravans that have been stored outdoors over the winter. It can also remove soot and resin from solid fuel boilers, nozzles and saw blades. Bio Power Plus is particularly effective against deep-frying fat and other cooking residues. In addition, it provides highly efficient cleaning of slag and build-up in garbage trucks, containers and waste bins.

Bio Power Plus is ready to use and should be sprayed directly onto the soiled area. Allow it to work for a few seconds, then wipe off with a cloth or paper towel. Bio Power Plus is also available in canister packaging, making it ideal for soaking parts, dilution with water is possible if desired. The product is a perfect alternative to alkaline degreasers and solvent-based cleaners. If used before bonding or on glass surfaces, the area should be rinsed or wiped with clean water to ensure optimal results. Rinse with water if the product is used on surfaces that come into contact with food. Ingredients: < 5% non-ionic surfactants.

Product data:

• Item number:	66930	66931	66932
• Packaging:	Atomizer	Canister	Canister
• Content:	500 ml.	5 L	20 L
